### ***Election/Restrictions***

1. Applicant's election of species I, drawn to Figures 16-20, in the reply filed on 20 September 2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

An argument that the generic claims are allowable is not a persuasive traversal of the election of species requirement.

### ***Drawings***

2. Figures 26-27 should be designated by a legend such as --**Prior** Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Objections***

3. Claims 1 and 7 are objected to because of the following informalities: The phrase "connecting said first bearing to" in line 8 of claim 1 should be replaced with the phrase --spacing said first bearing from-- or an equivalent to more clearly define the

Art Unit: 3617

invention. The cylindrical outer collar does not actually "connect" the first bearing to the side wall member, instead only axially spacing the two elements from one another.

The phrase "of a wheel" should be removed from line 2, while the phrase "to be" should be removed from line 7 of claim 7. These suggestions would more clearly define the invention and correct minor grammatical errors. Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

5. Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is indefinite due to the fact that it is unclear what the first line of the claim is actually claiming. It is unclear whether there is more than one wheel being referred to in line 1, and it is suggested that the phrase "of a wheel" be removed to more clearly describe the invention.

Claims 1 and 7 are indefinite due to the fact that it is unclear where the first and second bearings are actually located, since it is unclear what element(s) of the invention is being referred to as having "said hub body side" and "said side wall member side".

Claim 7 is further indefinite due to the fact that it is unclear what is actually being claimed by the term "bridgewise" in the last line of the claim.

***Allowable Subject Matter***

6. Claims 13-14 have been found to be allowable.
7. Claims 1-12 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

***Conclusion***

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references are considered to show wheel hubs formed of multiple parts and having a collar for axially spacing bearings from one another. For example, Panzica et al shows a wheel hub of the type described above.
